

## STEIGER DYNAMICS

### **STEIGER DYNAMICS introduces LEET Pro, the world's first workstation for the living room**

LOS ANGELES (Jan. 6, 2015) – HTPC manufacturer STEIGER DYNAMICS® launches LEET Studio and LEET Pro, workstation versions of its award-winning LEET Living Room PC, on January 6, 2015 at the International Consumer Electronics Show in Las Vegas, Nevada.

LEET® Studio and LEET® Pro workstations change the way of professional computing due to their optimization for the living room in terms of form factor, quietness, and TV compatibility. Latest generation Intel i5, i7, and Xeon processors with up to 18 cores, triple workstation-class AMD FirePro or NVIDIA Quadro GPUs, ultra-fast SSD drives, and ECC memory make LEET workstations substantially faster than the Mac Pro and capable of the latest and most demanding content creation tasks. LEET Studio and LEET Pro are available with full CPU and GPU liquid cooling, which allows optional graphics card overclocking for ultimate performance at unprecedented quietness under both idle and full load. LEET workstations feature an integrated front screen which displays customizable live system parameters like internal temperatures, drive space, and memory utilization, giving the user all critical information at once.

“We are extremely pleased to offer the world’s first workstation designed for living room use.” said STEIGER DYNAMICS CEO Martin Gossner. “The LEET Pro and LEET Studio provide creative professionals who work from home with insane amounts of power, allowing them to complete jobs more quickly, all while working from the comfort of their couch.”

Connected to a large-screen TV and used with the COUCHMASTER® lapdesk, LEET Workstations provide incomparable comfort for pursuing all kinds of creative or multimedia tasks. Working on up to 4K resolutions makes it possible to work on an extremely detailed level.

### **Specs and Pricing**

LEET Studio features affordable but powerful desktop-class CPUs, whereas the LEET Pro’s Xeon E5 CPUs and professional GPUs give it the highest processing power by volume among workstation PCs. Both systems are available with desktop and professional graphics cards which will significantly enhance the workflow in professional apps and programs such as Adobe Creative Suite, Solid Works, or 3D Studio Max

The all-new LEET Studio and LEET Pro will be available on [www.steigerdynamics.com](http://www.steigerdynamics.com) starting January 6<sup>th</sup>, 2015. Depending on the configuration, LEET™ Workstations start at \$1,999.
