

STEIGER DYNAMICS Adds The NVIDIA GeForce GTX 780 Graphics Card To Their LEET™ Gaming HTPC Line-Up

LOS ANGELES, CA – STEIGER DYNAMICS, award-winning manufacturer of custom Gaming Home Theater PCs, announced today that it will offer the NVIDIA GeForce GTX 780 graphics card on their LEET™ HTPC systems.

STEIGER DYNAMICS, newest member of NVIDIA's Partner Force program, is pleased to offer their systems equipped with the new NVIDIA GeForce GTX 780 graphics card. This newest generation of GeForce GTX graphics cards optimizes the user experience by enabling gaming at maximum detail settings. This successor to the GTX 680 is a welcome addition to the latest evolution of elite-class GPUs, delivering excellent performance and smooth visuals for the next generation of PC gaming titles – including Call of Duty: Ghosts, Watch Dogs, and Battlefield 4.

The GeForce GTX 780 is based on the same Kepler GK110 GPU as the GeForce GTX TITAN, and provides a CUDA core count of 2,304, 3GB of high-speed GDDR5 memory, and GPU Boost 2.0 technology. This massive increase in power allows higher clock rates and more active shader units than its predecessor, the GTX 680, providing for an approximately 30% increase in performance above the previous top model. In addition to being more

powerful than its predecessor, the GeForce GTX 780 contains a chip which is more efficient, outputting less heat, and thus rendering the graphics card more silent, making it the ideal graphics solution for a Gaming Home Theater PC.

The GeForce GTX 780 supports the latest gaming technologies from NVIDIA, including PhysX® and NVIDIA TXAA™, while the latest GeForce drivers reduce frame time variations to provide a smoother picture and a more enjoyable overall experience. All this power is set in a cast exterior aluminum frame with a high-efficiency vapor chamber for cooling, which lends the card an exotic, yet functional, design.

This powerful, yet affordable graphics solution will be available on all LEET™ lines in either a single card or a Dual-SLI configuration, with optional custom liquid cooling solutions. Additionally, all STEIGER DYNAMICS' systems come with free, US-based lifetime support. For more information regarding STEIGER DYNAMICS' Home Theater PCs with NVIDIA GeForce GTX 780 graphics solutions, please visit <https://www.steigerdynamics.com/shop-leet-systems.aspx>.

"We are very excited to offer the NVIDIA GeForce GTX 780 graphics cards with our systems," said Martin Hehensteiger, CEO and co-founder of STEIGER DYNAMICS. "The GeForce GTX 780 represents the perfect confluence between the price and performance of the GTX 680 and the GeForce GTX TITAN, and will certainly impress hardcore gamers."

About STEIGER DYNAMICS

STEIGER DYNAMICS is a revolutionary system builder bringing high-end PC gaming to the comfort of your living room. All STEIGER DYNAMICS products are developed pursuing a no-compromise approach in all respects and include only the highest quality components from carefully selected, best-in-category manufacturers. Every PC is hand crafted and tested by hardware engineers and enthusiasts who possess a fervent passion for the product and an unparalleled attention to detail. STEIGER DYNAMICS' products have won numerous awards including the Editor's Choice Award from PC Gamer magazine, an 'excellent' rating from PC Magazine, and a 9.9/10 rating from Xtreme CPU.
